Get funding for your Open Access publication

The approaching transition to Open Access publication models will entail a significant shift in the existing payment modalities. Especially the administration and payment of article processing charges (APCs) might soon be a major component of the daily business of many research communities. In this coffee lecture we will present current and future support and funding options.

André Hoffmann, HBZ

Efficient and organized with OneNote

As part of our daily work routine, we deal with content in all shapes and forms. For each of them we have places to store and try to organize it. But wouldn't it be comfortable to store it in just one place and organize it there? OneNote is such a digital note-taking application. In this coffee lecture we would like to show you, why OneNote could be your tool for organizing all your content in one place.

Manage your research output with ORCID

Make sure that you receive due and proper credit for all your research activities, particularly if you share a name with (potentially several) other researchers. A free ORCID connects you with all your scientific work, such as publications, research data, grants, patents, lab protocols and even with your peer review work. ORCID is integrated in ZORA and innumerable databases and platforms.

Data on the long run – tips for long-term storage

In order to make research results comprehensible for future generations, the long-term availability of data must not be neglected. In this coffee lecture you get to know examples of formats for the long run. Furthermore, you gain an insight into the differences of binary and clear text formats as well as compressed and uncompressed data.

Florian Steurer, HBZ
