

Tutorial: BibLaTeX Export from Zotero

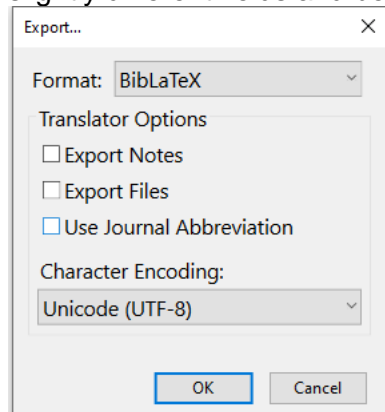

- Navigate to File → Export Library. **This will export ALL the references in your library.**

If you wish to export only selected references, move them into a folder. Then right click the folder and choose “Export Collection”.

- Select BibLaTeX as the export format. Note: BibTeX works as well, but BibLaTeX has slightly different fields and better compatibility with the BibLaTeX package.

- Then navigate to the folder where you want to save the file and click Save.
- Now Zotero exports your references into a *.bib file that works well with the BibLaTeX package.
