Job Title: Intern FinTech Specialist

About Swiss Re
This is your opportunity to join Swiss Re Group - one of the world's leading wholesale providers of reinsurance, insurance and other innovative forms of insurance-based risk transfer. Our business at Swiss Re is about understanding and analysing the major risks that concern the world - from natural catastrophes to climate change, from ageing populations to cybercrime. We combine experience with expertise and innovative thinking to create new opportunities and solutions for our clients. And we enable the risk-taking essential to enterprise and progress. This is only possible with around 10,000 truly exceptional Swiss Re people across our group worldwide.

About the role
We are looking for a highly motivated intern who is interested in helping craft the FinTech strategy for Robo-Advisory and other initiatives in one of the world's largest reinsurance companies. The ideal candidate is willing to work on projects shaping the digital strategy of Asset Management and will join our diverse team in Zurich, collaborate with colleagues from New York, London, and Bratislava, plus:
- Research and update the working group on FinTech market changes
- Facilitate the identification of potential use cases for Robo-Advisory together with business and IT professionals within Swiss Re
- Support the creation of papers and brochures describing the impact of digital technologies on an Asset Manager
- Identify relevant papers from top consulting companies and financial service companies relevant for FinTech topics in our firm
- Learn and apply new skills in project management and building cutting edge presentations
- Facilitate information sharing on Robo-Advisory topics to the working group
- Support RegTech and Blockchain initiatives

About the team
With more than USD 150 bn of assets under management, Swiss Re Asset Management manages the assets generated through the core insurance and reinsurance business. With the advent of technologies such as Robo-Advisory, Blockchain, Cognitive computing or robotics the value chain of asset management will radically change in the future. This is why we are looking for passionate and smart individuals who have a background in digital technologies and who are seeking for exciting possibilities to apply their know-how in the financial world.

About You
- Tech-savvy and curious: you study computer science, finance, math or business administration with a technology focus; you have strong analytical skills and are eager to apply your knowledge in the financial world
- Knowledge about financial products, investment strategies, regulations and the value chain of an asset management company is advantageous
- Passionate about FinTech, Tech and digital trends
- Self-motivated and great teammate: you drive progress independently and thrive in an environment where you have room to grow and perform and you love working in a team
- Organized and fluent: you get things done and command excellent oral and written English, additionally German would be a plus
- You are at least in the second half of your studies
Forward-looking and driven: you have a strategic mind and are keen to make a difference that counts and are willing to propose creative ideas and put yourself out there for them.

Duration of internship: 4-6 months (ideally 6 months), 100%, starting February or March 2018 (start between February and April would be ideal).
