**Work Location**  Zurich, Switzerland

**Company**  Anaveon AG

**Job Type**  Senior Research Associate, Full Time

**Job Description**  Anaveon is a biotechnology start-up with a biologics pipeline in late pre-clinical phase in the field of Immuno-oncology. We are looking for a qualified Research Associate with a Master’s degree in Science to join our laboratories at the University Hospital Zurich, located together with an established laboratory consisting of graduate students and associates working in similar areas.

She/he will be responsible for the planning and execution of in vitro and in vivo experiments for the functional and biochemical characterization of antibodies.

In this multidisciplinary research position, she/he will have the opportunity to work with a wide variety of techniques and instruments within an international, highly flexible team environment. The ultimate goal is to provide high quality and relevant data necessary for the progress of our antibodies through preclinical development and clinical studies.

We offer a very competitive compensation package, including incentives.

**Minimum requirements**  
- Bachelor or Master’s degree (without a PhD) with recent research experience in Immunology, Biochemistry, Cell Biology.
- Strong experience in Cellular Immunology: Cell culture, primary cells, immune cell phenotyping (functional characterization of immune cell responses using multiparametric analysis by flow cytometry), in vitro assays (assessment of antibody binding, antibody mediated tumor cell killing)
- Ability to work in vivo with rodents as well as handling clinical samples such as blood and ability to work in a biosafety level 2 environment
- Experience in Molecular Biology will be helpful.
- Enthusiastic individual with a high degree of independency and flexibility regarding planning and execution of experiments
- Well-organized working style, technical and experimental excellence as well as timely and accurate data recording and reporting
- Track record of problem solving, excellent organization and communication skills and the proven ability to collaborate within multidisciplinary teams
- Strong working knowledge of standard MS Office tools (Word, Excel, PowerPoint etc.) as well as databases
- Fluency in English (oral/written); German and/or French language skills are advantageous
