Student Position in Software Engineering at Molecular Partners

Molecular Partners is a thriving and fast growing clinical stage biotech company located in Zürich-Schlieren, Switzerland. The development of a broad portfolio of therapeutic product candidates in oncology and ophthalmology based on our proprietary DARPin platform allowed a successful listing of the company on the SIX Swiss Exchange (MOLN). Next to our own proprietary pipeline of drug candidates we have entered into collaborations with international pharmaceutical companies.

We are looking for a highly motivated student to support us on an hourly basis in the development of our internal data management platform. In this role, your main responsibility will be to help design and implement client-side functionalities in Java to store, access and manipulate our research data.

You will work closely with our lead developer in a flexible working scheme. We expect you to have at least 12 hours available per week to work on this project. Thereby, it will be necessary to spend at least four hours/week on our premises in Schlieren to ensure a close alignment with our development goals. The project is considered to be a pilot and is scheduled to take place during the month of June. If we consider the project a success, a prolongation of the setup for at least six months is possible.

For this position, we expect you to have the following background and skills:

- You are studying computer science, electrical engineering or in a similar field.
- You can demonstrate your broad abilities in Java.
- You are familiar with git.
- You have gained experience with larger software projects during your studies or while working in the industry.
- You have a highly independent working style while also being able to work successfully in a team.

The successful candidate will be part of a dynamic and highly motivated international team. If you are interested in this position at Molecular Partners, we are looking forward to hearing from you by latest May 10th, 2018. Please submit (via e-mail only) your detailed curriculum vitae including a motivation letter to:

Molecular Partners AG, Wagistrasse 14, CH-8952 Zurich-Schlieren, Switzerland, HR@molecularpartners.com
