Summer School**

Part 5
2nd – 7th September

**Investigating
an archaeological
subalpine landscape
through the millennia**

Universität
Zürich^{UZH}

2024

for

Alpine Archaeology

The Universities of Bern and Zurich are organising the 5th annual SISA in cooperation with local archaeological researchers in Muotathal (Canton Schwyz). This year's SISA will focus on alpine landscapes, geology, "old school" and "modern" prospection and excavation methods as well as social and economic systems over time in a subalpine region. It comprises keynote speakers for specific topics as well as the teaching of methods, applications and models. Lectures and practical fieldwork will take place in an archaeologically promising region in central Switzerland.

Topics

Geology

**Resources: Chalk, Milk
Lithics**

Mesolithic

Diachronic Landscape

Information

Date	2nd – 7th of September 2024
Intended for	PhD and advanced MA students with special interest in mountain, recent and/or mesolithic archaeology
Conditions	Working in subalpine environment (800–2,500 m a.s.l.): Physical fitness!
