Part time job for Art History students (maximum 15h per Week)

Starting date: as soon as possible

The Startup Art Recognition AG has developed an AI for art authentication and forgery detection. More information is available on www.art-recognition.com

We are searching for a motivated student to join our team of art historians and AI developers as an **Art Historical Research Assistant (Data Collection Support)**. The successful candidate will work from our office in Adliswil, near Zurich.

Responsibilities:

- Find images needed to train the AI from online sources and Catalogue Raisonnés.
- Organize the images into various categories such as authentic, workshop, followers, circle of, imitations, etc.
- Research academic resources including catalogues and online sources to gather related art historical information
- Compile the collected information and images into Excel tables and on the cloud.

Profile:

- You are accustomed with Excel
- You understand the different art history periods/movements.
- You know where to find relevant information for a specific artist and you understand how to work with Catalogue Raisonnés
- You speak good English

Working Environment:

- You will be onboarded and guided by the company's art historians
- The working times can be flexibly agreed on
- The opportunity to work in a fun and challenging startup environment.

Write us on the E-mail address contact@art-recognition.com and we will be in touch shortly!
