

Laboratory of Nanoscale Biology at the Paul Scherrer Institute develops novel electron imaging techniques and invites bright and motivated students from University of Zurich to join our research in frame of Bachelor or Diploma projects. We have a number of exciting, new research problems which include but not limited to: imaging and diffraction with light and electrons, experimental and theoretical research, computational projects involving machine learning techniques, and others. The working place/time is flexible and the travel costs will be reimbursed (up to 70 SFr per day for non-regular visits). Interested candidates are encouraged to get in touch with Tatiana Latychevskaia (tatiana.latychevskaia@psi.ch) for further details.
