Values / Werte, HS2012, Eldad Davidov Course assistant: Rossalina Latcheva, latcheva@soziologie.uzh.ch

Values are complex and multidimensional concepts that are hard to measure. Therefore, it is not surprising that the literature has offered several and different approaches to measure them. Interestingly, these approaches emerged from different disciplines. The most famous theories are Schwartz' individual and societal level theory of human values that emerged from his social psychological studies, and Inglehart's theory of materialism-postmaterialism. However, there are other approaches to measure values. These theories suggest that values are multidimensional, influenced by different factors and have different consequences. Furthermore, on the cultural level some theorists have argued that societies may be characterized by certain values. During the seminar we will discuss studies that present how values are conceptualized, measured and empirically applied according to different theories. A special focus will be given to the basic human values theory of Shalom Schwartz. Furthermore, we will discuss studies that link values to external individual and societal (macro-level) variables in a theory-driven way. We will emphasize both theoretical considerations and methods designed to measure values and to analyze models testing the operation of values. The requirements are presence and active participation in the discussions, a presentation and writing a paper the end of the seminar. Reading the paper/s for each meeting in advance is required. Each participant prepares 2-3 discussion points in advance Rossalina sends them per email to Latcheva before the (latcheva@soziologie.uzh.ch).

Evaluation is **not** based on the English command. It is not mandatory to interact in English, but rather an opportunity for those who are interested in it.

Die Beurteilung für das Seminar basiert nicht auf der Beherrschung der englischen Sprache. Es ist nicht verpflichtend, während der Sitzungen auf Englisch zu kommunizieren; denen, die daran interessiert sind, soll aber die Gelegenheit dazu gegeben werden.

During the semester break (summer break) and no later than September 15th 2012 participants should: a) read the 5 basic texts (see below), b.) pick up three possible topics from the course program (see below) which would be most interesting to them to present, c) communicate their preferences for a presentation in the first meeting of the seminar and d) make some further literature search about these topics to be better prepared for the presentation. Presentations may be in English or German.
